PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re Application of: Rick L. Allison

Group Art Unit: 2683

Serial No.: 10/718,292

Examiner: Stephen M. D'Agosta

Filed: November 20, 2003

Docket No.: 1322/148

Confirmation No.: 1208

For: METHODS AND SYSTEMS FOR TRIGGERLESS MOBILE GROUP DIALING

RESPONSE TO STATEMENT OF REASONS FOR ALLOWANCE UNDER
N.P.E.P. §1302.14

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

REMARKS

In the Notice of Allowability dated February 16, 2006, the Examiner indicated:

The applicant's amendment received February 1, 2006 overcomes the prior art of record. Hence claims 1-57 are allowed. The examiner notes that the amendment clarified what a "signaling message routing node" was, e.g. "comprising a signal transfer point (STP) for routing call setup and mobile subscriber routing information request messages between other nodes in a network".

Serial No.: 10/718,292

It is the examiner's position that this "function" is described in each independent claim and that an STP is the only device used to perform that specific function.

Applicants did not represent during prosecution that an STP is the only device used to perform the recited functionality. Applicants respectfully submit that the claims are patentable over the references cited in the Official Action for the reasons stated in Applicants' amendment dated February 1, 2006, rather than the above-referenced statement.

Although it is believed that no fee is due, the Commissioner is hereby authorized to charge any deficiencies of payment or credit any overpayments associated with the filing of this correspondence to Deposit Account No. 50-0426.

Respectfully submitted,

JENKINS, WILSON, TAYLOR & HUNT, P.A.
